

FARHAN RANGKUTI

farhanrangki@gmail.com | www.linkedin.com/in/farhan-rangkuti | www.github.com/farhanrkt

A highly motivated Informatics graduate from Telkom University with a strong interest in Data and Machine Learning. Proven ability to excel both independently and in teams, even under pressure. Actively seeking opportunities to apply and further develop skills in Machine Learning, Data Science, or related fields.

Work Experiences

PT SMART Tbk - Bogor, Indonesia <i>Bioinformatics Technician</i> - Build custom modules on the internal company website, automating daily processes and enhancing overall data accessibility for the research team. - Designed and implemented a large-scale ETL (Extract, Transform, Load) pipeline to process, validate, and ingest millions of complex genotype and phenotype data. - Managed on-premise server operations and health, proactively resolving hardware and software bottlenecks to minimize operational downtime.	Nov 2025 - Present
Telkom University - Bandung, Indonesia <i>Research Assistant</i> - Conducted data exploration and preprocessing on SNAP datasets for social network analysis. - Implemented GraphSAGE, GCN, and GAT in community detection tasks. - Developed model training pipelines using PyTorch Geometric. - Prepared and presented research reports.	Nov 2024 - Feb 2025
Telkom University - Bandung, Indonesia <i>Teaching Assistant</i> - Assisting the lecturer in managing a class of 41 students. - Creating assignment solutions. - Grading the student assignments. - Creating a report of student grades and activities.	Feb 2024 - Jul 2024
Bangkit Academy 2023 by Google, GoTo, Traveloka - Bandung, Indonesia <i>Machine Learning Cohort</i> - Attended approximately 250 hours of instructor-led training (ILT) encompassing foundational to advanced machine learning skills. - Contributed to a capstone project centered on a healthy food recommendation system. - Conducted data exploration and preprocessing, including data cleaning, normalization, and transformation. - Evaluated and optimized models using cross-validation techniques and parameter tuning. - Presented capstone project results through reports and presentations.	Aug 2023 - Jan 2024

Education

Telkom University - Bandung <i>Undergraduate Informatics, 3.56/4.00</i> - Final Project: "Comparative Evaluation of Graph Neural Network Algorithms for Music Recommendation Systems" - Presented at the International Conference on Intelligent Cybernetics Technology and Applications (ICICyTA) 2024. - Recognized as the Best Paper (1st Place) - Recognized as the Best Presenter (8th Place)	Feb 2021 - Feb 2025
---	---------------------

Skills, Achievements & Other Experience

Certifications  TensorFlow Developer Languages: Native Speaker in Indonesian; Proficient in English Technical Skills: Proficient in Python, C++, SQL, Tableau, Microsoft Excel Soft Skills: Teamwork, Problem-solving, Adaptability Training: Online Course in Google Data Analytics (Coursera), Machine Learning Specialization (Coursera), DeepLearning.AI TensorFlow Developer (Coursera)
