

FARHAN RANGKUTI

farhanrangki@gmail.com | www.linkedin.com/in/farhan-rangkuti | farhanrangkuti.vercel.app

A highly motivated Informatics graduate from Telkom University with a strong interest in Data and Machine Learning. Proven ability to excel both independently and in teams, even under pressure. Actively seeking opportunities to apply and further develop skills in Machine Learning, Data Science, or related fields.

Work Experiences

PT SMART Tbk - Bogor, Indonesia

Nov 2025 - Present

Bioinformatics Technician

- Built and maintained internal CodeIgniter modules used across several departments, genotype and phenotype data tools for biotechnology researchers, leave requests, day-off entries, design requests, and a guestbook replacing paper-based processes.
- Built two self-hosted AI tools on the internal company website with no external APIs: a document Q&A system (n8n, bge-m3, Qdrant, streamed answers) and a coding assistant with saved conversation history.
- Designed and implemented a large-scale ETL (Extract, Transform, Load) pipeline to process, validate, and ingest millions of complex genotype and phenotype data.
- Ran the on-premise server hosting these systems, handling deployment, monitoring, and troubleshooting, and acting as first-line support for researchers using the tools.

Telkom University - Bandung, Indonesia

Nov 2024 - Feb 2025

Research Assistant

- Benchmarked three graph neural network architectures (GraphSAGE, GCN, GAT) for community detection on SNAP datasets.
- Built reproducible training and evaluation pipelines in PyTorch Geometric, covering data preprocessing, sampling, and hyperparameter tuning.
- Presented findings and created the research reports.

Telkom University - Bandung, Indonesia

Feb 2024 - Jul 2024

Teaching Assistant

- Taught and supported 41 students in Discrete Mathematics, supporting class sessions and answering questions.
- Wrote reference solutions and graded assignments.
- Tracked and reported student grades and participation for the lecturer.

Bangkit Academy 2023 by Google, GoTo, Traveloka - Bandung, Indonesia

Aug 2023 - Jan 2024

Machine Learning Cohort

- Selected for Bangkit Academy 2023 (Google, GoTo, Traveloka), completing 250 hours of instructor-led machine learning training and earning the TensorFlow Developer Certificate.
- Built the recommendation model for a healthy food recommendation system as the capstone, covering preprocessing through cross-validation and hyperparameter tuning.
- Presented results to peers and mentors.

Education

Telkom University - Bandung

Feb 2021 - Feb 2025

Undergraduate Informatics, 3.56/4.00

- Final Project: "Comparative Evaluation of Graph Neural Network Algorithms for Music Recommendation Systems"
 - Presented at the International Conference on Intelligent Cybernetics Technology and Applications (ICICyTA) 2024.
 - Recognized as the Best Paper (1st Place)
 - Recognized as the Best Presenter (8th Place)

Skills, Achievements & Other Experience

- Certifications**  TensorFlow Developer
- Languages**: Native Speaker in Indonesian; Proficient in English
- Technical Skills**: Proficient in Python, C++, PHP, SQL
- Soft Skills**: Teamwork, Problem-solving, Adaptability
- Training**: Online Course in Google Data Analytics (Coursera), Machine Learning Specialization (Coursera), DeepLearning.AI TensorFlow Developer (Coursera)
